

The machines behind every metre.

Ramana builds machinery for textile brands — engineered for long runs, consistent quality and easy maintenance. From the first bolt to years of after-sales support, we build the machines your production depends on, so your mill never has to wait on its equipment.

Why mills choose Ramana

01	Built for long runs	Heavy-duty construction designed for round-the-clock production schedules.
02	Consistent output	Precision engineering that keeps quality steady from the first metre to the last.
03	Easy to maintain	Accessible assemblies and readily available spares — less downtime, lower cost.
04	Service that shows up	Installation, operator training and responsive after-sales support.
05	Value that lasts	Machines priced for payback — built to earn their keep for years.

Machinery that keeps textile brands running.

Weaving · Knitting · Processing · Finishing — one manufacturing partner.

EST. QUALITY FIRST

A machine for every **stage** of the fabric.

Every machine is configured to your material, width and output targets — detailed specification sheets are shared per model during consultation.

Range 01

Weaving & Loom Systems

Reliable weaving machinery for consistent fabric formation across long production runs.

- Steady pick after pick
- Configurable widths
- Low-vibration operation

Range 02

Knitting Machines

Circular and flat knitting solutions built for uniform loops and minimal yarn breakage.

- Smooth yarn paths
- Quick style changeovers
- Consistent GSM control

Range 03

Dyeing & Processing

Processing machinery engineered for even treatment, batch after batch.

- Uniform colour take-up
- Efficient utility usage
- Simple recipe repeatability

Range 04

Finishing & Calendering

Finishing lines that give fabric its final hand-feel, sheen and dimensional stability.

- Even pressure and heat
- Gentle fabric handling
- Repeatable finish quality

Range 05

Custom & Special Purpose

Purpose-built machines designed around your product, process and floor space.

- Built to your process
- Fits your floor plan
- Engineered with your team

Always included

Spares & Service

Every Ramana machine comes with a partner behind it — not just a warranty card.

- Genuine spares supply
- Scheduled maintenance visits
- Operator training & support

We stay until it runs.

01	Consultation	We understand your fabric, volumes and floor — then recommend the right configuration.
02	Build & quality checks	Your machine is manufactured and tested against our quality standards before dispatch.
03	Installation & commissioning	Our engineers install, align and run the machine on your floor until output is stable.
04	Training & handover	Your operators learn the machine hands-on — running, adjusting and basic maintenance.
05	After-sales support	Spares, scheduled service and a phone number that answers — for the machine's whole life.
